Data Structures and Algorithms - Assignment 6

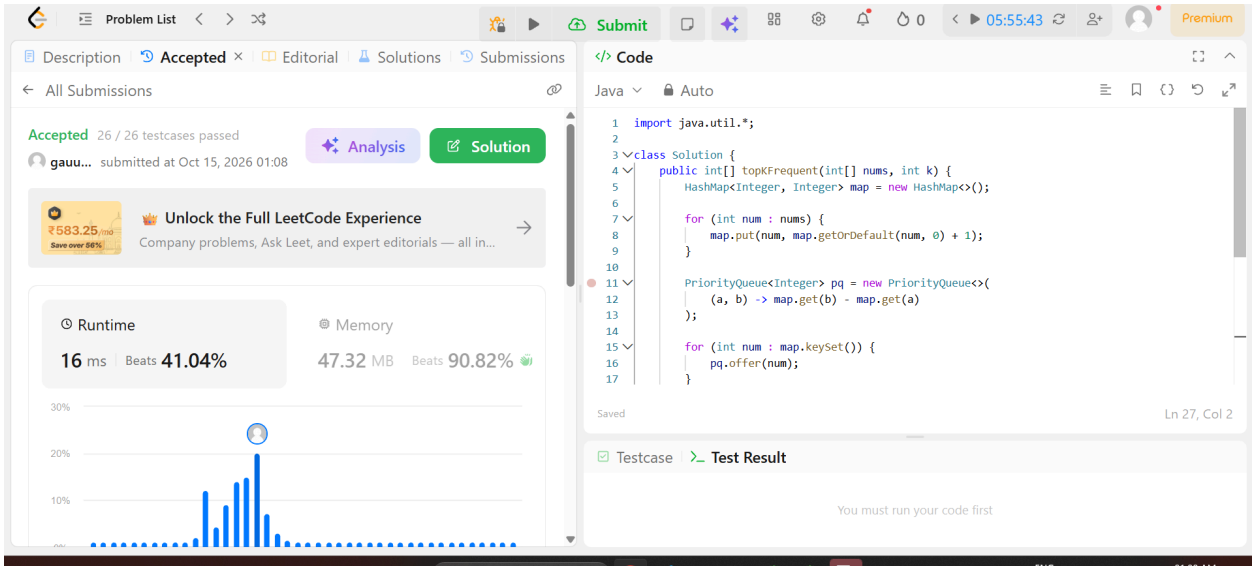

. https://leetcode.com/problems/balanced-binary-tree/description/

3. https://leetcode.com/problems/kth-largest-element-in-an-array/description (solve using heap)
You will need 0 based indexing for heap root is at arr[0] node : i left child : 2i + 1 right child : 2i + 2 parent : (i-1)/2 Last Non leaf node : (n/2)-1 ==> first parent from right side

4. https://leetcode.com/problems/top-k-frequent-elements
